

Xda[®] Graphite

Exclusive to O2 the Xda Graphite is one of the most powerful phones around. A slim 3G smart phone with extra fast data connectivity and video-calling, it's the ultimate mobile office experience.

The Xda Graphite features Pocket Outlook[®] to help you manage your calendar and contacts at the touch of a button. Based on Microsoft Windows Mobile 5.0, it allows you to send and receive email in real time using Microsoft direct push email¹ and you can browse the Internet wherever you are via a clear, high quality colour screen.

Designed for...

Customers that want the functionality of a PDA on a phone. Ideal for primarily voice users who want to do more with their phone than just voice calls and text.

A bit more detail

- Small and lightweight phone form factor
- Incorporates 3G and WLAN connectivity for faster Internet and email delivery
- Includes Intel PXA 270 (416 MHz) processor, faster than previous smart phones
- 2 mega-pixel camera with flash and front facing camera for video calling
- Supports Windows Mobile 5.0 to provide real time email¹ and internet access – open, edit and send Microsoft Office attachments quickly and easily
- Use Outlook Mobile to send and receive emails with attachments
- Easily synch between inbox, calendar, contacts and tasks between PC and phone using Microsoft Activesync (supplied)
- High quality, full colour screen to access the internet and browse the web.
