

ESET®NOD32® Antivirus Version 4.0

The latest generation of ESET's Internet security for businesses, ESET NOD32®, provides proactive protection against increasingly sophisticated and targeted cyber threats. Known for being fast and unobtrusive, it allows you to focus on your business, not your antivirus. ESET NOD32 Antivirus uses advanced heuristics that provide the best proactive detection against today's ever-changing threats; before other software is able to detect them. But don't take our word for it – ESET has consistently received the highest marks in proactive protection tests conducted by av-comparatives.org, and received the highest ranking on Forbes list of best-in-class antivirus products.

Key Features:

Smart Detection: ESET NOD32 Antivirus uses proactive detection technology to identify malware, providing your system with around the clock protection. Proactive detection relies on advanced heuristics as well as generic and genetic algorithms to detect new malware and new mutations of known malware.

Extremely Light Footprint: ESET NOD32 Antivirus is so light your users will not even notice it's running.

Advanced Archive Scanning: Threats don't always enter where you expect. ESET NOD32 Antivirus can scan into layers of compressed files to ferret out malicious software. Users can control search depth, file size, archive size and timeout of archive scans.

Encrypted Communication Control: Scanning SSL-encrypted HTTP and POP3 protocols and even defeats threats that hide from plain sight.

Enhanced Portable Computer Support: Enhanced settings for portable computers allow tasks to be postponed when the computer is running on battery power.

ESET SysRescue: Creates rescue CDs, DVDs or USB drives for cleaning unstable, infected systems.

ESET Sysinspector™ Integration: Administrators will love our advanced diagnostic tool for taking “deep-dive” snapshots of systems. Files and processes are colour coded in scan logs to make it easy for IT administrators to identify potential threats in the system.

Uninstall Password Protection: Password protection prevents ESET NOD32 Antivirus from being uninstalled by unauthorised employees or visitors.

ESET Self Defence and HIPS: ESET NOD32 Antivirus has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorised attempts to modify your OS or applications are actively blocked through a combination of advanced behavioural analysis and network filtering that monitor your system processes, files and registry keys.

Removable Media Access Control: Protects against infections from USB drives, floppies, CDs and DVDs.

Improved Cleaning: Cleaning of certain difficult to remove infections has been significantly improved.

Support for Cisco Network Admission Control: Regulatory compliance is simplified with native support for Cisco NAC.

Key Benefits:

Proactive Protection: Award winning ThreatSense+ technology combines advanced heuristics and malware signatures to deliver the best Zero-Day protection.

Precise Detection: Accurately identifies known and unknown threats. Consistently wins top awards from testing labs. Businesses will bypass false alarms that cause confusion, loss of time and resources.

Lightweight: Built to ensure fast system start up, utilising less system resources than competitors. More room for other business applications to run, increasing employee productivity.

Fast: Highly optimised code ensures file scanning and updates are quick and efficient, maximising work performance.

Remote Administration: Ensures hassle-free installation, centralised administration and seamless updating within a network environment. From five users to hundreds of thousands can be managed through Remote Administrator, saving resources, time and money.

Best Detection:

- ESET is the leader in proactive threat detection, with more advanced + awards for superior threat detection than any other vendor since May 2005*
- ThreatSense® technology detects around 70% of new and unknown threats heuristically - before a signature update is available. ESET finished in third place, detection almost 30% more than the runner up**
- ESET ThreatSense is the only antivirus technology that has not missed a single In-The-Wild Virus in rigorous Virus Bulletin VB100 testing since May 1998***

Documentation:

- Product quick start guide (PDF for download)
- Operating System Integration Help (F1-key)

System Requirements:

Processors supported: Intel or AMD x86 / x64

Operating Systems: Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows Server 2000, Microsoft Windows Server 2003, Microsoft Windows Server 2008

Memory: 44 MB

Disk Space (download): 28 MB (download) / 35 MB (installation)
