

ESET® Smart Security Version 4.0

Maintain the highest level of security across all of your networks. ESET Smart Security® combines an advanced management console and award-winning ThreatSense® engine with firewall and antispam. Its fast and thorough scanner stops even SSL encrypted, network and email borne threats. ESET's advanced heuristics protect your endpoints from known and new threats so your users can focus on business. Our proactive protection is so strong it stops new threats before other products realise they exist. Honoured with a five star rating by SC Magazine (January 2009), and ranked highest on Forbes list of best-in-class antivirus products, ESET Smart Security has the proven power to protect your company's valuable data and reputation.

Key Features:

Fully Integrated Protection: ESET Smart Security integrates our powerful antivirus engine with state-of-the-art personal firewall and anti spam modules offering comprehensive protection to the workstations across your network.

Extremely Light Footprint: ESET Smart Security is so light your users will not even notice it's running.

Advanced Archive Scanning: Threats don't always enter where you expect. ESET Smart Security can scan into layers of compressed files to ferret out malicious software. Users can control search depth, file size, archive size and timeout of archive scans.

Encrypted Communication Control: Scanning SSL-encrypted HTTP and POP3 protocols and even defeats threats that hide from plain sight.

Enhanced Portable Computer Support: Enhanced settings for portable computers allow tasks to be postponed when the computer is running on battery power.

ESET SysRescue: Creates rescue CDs, DVDs or USB drives for cleaning unstable, infected systems.

ESET Sysinspector™ Integration: Administrators will love our advanced diagnostic tool for taking "deep-dive" snapshots of systems. Files and processes are colour coded in scan logs to make it easy for IT administrators to identify potential threats in the system.

Extended Email Client Support: Native support for Microsoft Outlook, Microsoft Outlook Express, Mozilla Support Thunderbird, Windows Live Mail and Windows Mail makes messaging security simple. POP3 and IMAP protocols support delivers the same protection to other email clients.

ESET Self Defence and HIPS: ESET Smart Security has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorised attempts to modify your OS or applications are actively blocked through a combination of advanced behavioural analysis and network filtering that monitor your system processes, files and registry keys.

Removable Media Access Control: Protects against infections from USB drives, floppies, CDs and DVDs.

Support for Cisco Network Admission Control: Regulatory compliance is simplified with native support for Cisco NAC.

Key Benefits:

Proactive Protection: Award winning ThreatSense† technology combines advanced heuristics and malware signatures to deliver the best Zero-Day protection. A single integrated security solution with anti spam and personal firewall features.

Precise Detection: Accurately identifies known and unknown threats. Consistently wins top awards from testing labs. Businesses will bypass false alarms that cause confusion, loss of time and resources.

Lightweight: Built to ensure fast system start up, utilising less system resources than competitors. More room for other business applications to run, increasing employee productivity.

Fast: Highly optimised code ensures file scanning and updates are quick and efficient, maximising work performance.

Remote Administration: Ensures hassle-free installation, centralised administration and seamless updating within a network environment. From five users to hundreds of thousands can be managed through Remote Administrator, saving resources, time and money.

Best Detection:

- ESET is the leader in proactive threat detection, with more advanced + awards for superior threat detection than any other vendor since May 2005*
- ThreatSense® technology detects around 70% of new and unknown threats heuristically - before a signature update is available. ESET finished in third place, detection almost 30% more than the runner up**
- ESET ThreatSense is the only antivirus technology that has not missed a single In-The-Wild Virus in rigorous Virus Bulletin VB100 testing since May 1998***

Documentation:

- Product quick start guide (PDF for download)
- Operating System Integration Help (F1-key)

System Requirements:

Processors supported: Intel or AMD x86 / x64

Operating Systems: Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows Server 2000, Microsoft Windows Server 2003, Microsoft Windows Server 2008

Memory: 48 MB

Disk Space (download): 32 MB (download) / 46 MB (installation)
