axis® diplomat

Much more than just an accounting system!

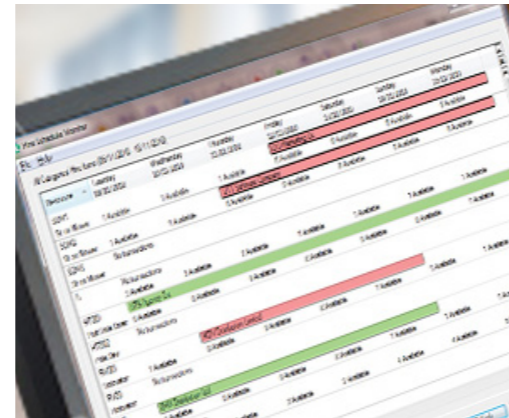

axis® diplomat

ACCOUNTING & BUSINESS INFORMATION SYSTEMS

At **axisfirst** we have over 30 years experience in designing, supplying, and advising on, accounting and business software solutions for small and medium sized companies.

Central to the **axisfirst** solution is **axis® diplomat**. Whether you are a wholesale, distribution, manufacturing, retail or service company, **axis® diplomat** is a competitive, flexible and highly capable business information system that far exceeds being just an accounts package. A very sophisticated stock control system, coupled with Sales Order Processing and Purchase Order Processing modules makes the system particularly suited to anyone that buys and sells... well, almost anything!

BENEFITS OF AXIS DIPLOMAT

- Scalable solution for 1 to 250 users
- Vast range of modules available
- Handles large databases of hundreds of thousands of customer accounts and prospects
- Powerful integration to ecommerce solutions
- Class-leading stock facilities, including warehouse management option using hand-held barcode-driven devices
- Interfaces to 3rd party service providers including couriers, postcode address retrieval, TPS validation and card payment services
- Telephony interface for efficient telesales and telemarketing campaigns

the versatile software solution for your entire business

AXIS DIPLOMAT FOR ACCOUNTS AND FOR BUSINESS

axis® diplomat is divided into a number of modules including Accounts, Warehouse Management, Sales and Purchase Order Processing, MRP, Manufacturing, Foreign Currency and Point of Sale.

Additional modules and client licences can be added at any time, which means that the system grows with your business. From a single user Accounts system to a one hundred user warehousing, manufacturing or mail order processing system, **axis® diplomat** remains totally scalable.

Run your **axis® diplomat** system on industry-standard server platforms from Microsoft.

Smaller systems (up to five users) can also be run on peer-to-peer (or serverless) networks using commercial-grade Windows operating systems. For multi-site operation, or for high through-put systems, we recommend the use of Microsoft Remote Desktop Terminal Services as the preferred technology. For a full list of supported operating systems and hardware requirements, please visit our website at www.axisfirst.co.uk

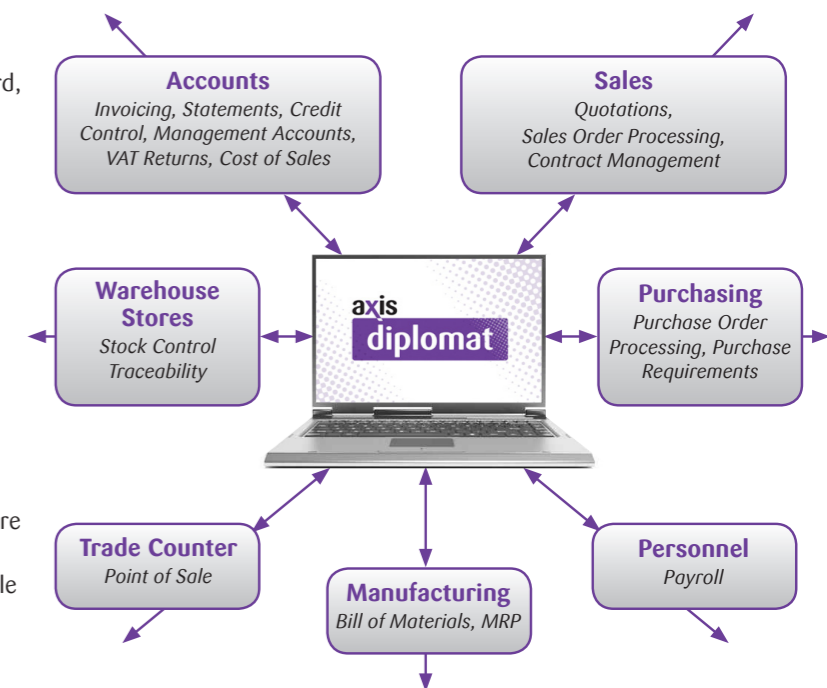

AN INTEGRATED SOLUTION

Every **axis® diplomat accounts system** contains, as standard, a massive range of standard facilities, including:

- Sales, Purchase and Nominal Ledgers
- Cash Book
- Invoicing
- Budgeting
- Stock Control
- Business Intelligence
- CRM (Contact Management)
- Data Security (Backup) Facilities
- User Security

Reflecting the fact that the majority of systems usually require Sales Order Processing and Purchase Order Processing, there is also an **axis® diplomat Accounts Value Pack** available which, in addition to the items listed above, includes the first Client Licence and both the Sales Order Processing and Purchase Order Processing modules.

ECOMMERCE WEBSITE INTEGRATION

axis® diplomat is designed to fully integrate with the ecommerce solution from **axisfirst web services - axis® vMerchant**.

You can drive any number of completely independent websites from a single **axis® diplomat** system, with each site having different brand identities, different products and even different pricing for the same products. If you are a trade wholesaler then your trade account customer's with special pricing will automatically see that same special pricing when they log on to the website; very little maintenance of the website is required as **axis® diplomat** automatically keeps your website up-to-date with pricing changes, new products, changes to products (pictures, descriptions, stock on hand, etc.)

Orders are automatically imported into **axis® diplomat**, which can then automatically generate order status update emails to your customers, collect payments for authorised credit/debit cards and so. Accounts are created automatically for new customers on your website so you can use the built-in sales analysis, marketing and CRM tools within **axis® diplomat** to manage your online presence.

This makes **axis® diplomat** ideal for multi-channel retailers as well as for trade wholesalers. Integration with your telephone system and with postcode databases means that you have the tools to hand for your call centre as well as for your warehouse, accounts and purchasing departments.

"The integration between **axis vMerchant** and our existing **axis® diplomat** system meant that we were able to build and launch a website very easily, without really knowing anything about web technologies."
