# GDPR 365 PLANS

Take the pain out of GDPR compliance  
with axisfirst and GDPR 365

## WHY CHOOSE GDPR 365 COMPLIANCE FROM AXISFIRST?

**Save Time & Money**

**Demonstrate Compliance**

**Easy To Get Started**

## Get a clear picture of your compliance position

Know where your data protection risks are in a simple view that outlines the status of each risk and who is responsible for the compliance enabling you to see immediately what risks require the most attention.

## Confidently manage your data breaches

Easily assess the severity of each data breach within GDPR 365 to know whether you need to inform the individual concerned, your own Information Officer (IO) or the Information Commissioner's Office (ICO). Comprehensive logs record the history of events and actions to mitigate the breach.

## Process access requests promptly & professionally

Management tools walk you through the response process and highlight upcoming deadlines. GDPR 365 actively reduces your response time by utilising your data map and identifies all of the data you hold on an individual and where that data is held in your business.

## Locate, identify & retrieve data quickly

GDPR 365 automatically builds up your own records of data breach activities, enabling you to track personal data and easily identify the location of the data you hold.
