SPEAR PHISHING

Prevent CEO fraud and Business Email Compromise attacks in a single solution from Heimdal Security.

WHY CHOOSE HEIMDAL THOR MAILSENTRY FROM AXISFIRST?

Raise Employee Awareness

24/7 Monitoring

Eliminate imposter & internal email compromise scams

With 24/7 live monitoring by a specialist fraud team, this solution automatically detects CEO fraud, advanced malware and business email compromise threats whilst working on top of any existing mail filtering solutions in Office 365.

Social Engineering

Social engineering is a sophisticated way that fraudsters are attempting to convince people that their emails are legitimate. It only takes one employee to believe a request for funds is genuine and the damage is done.

It's a rising trend

Whilst SPAM is still prevalent, there is a rising trend in more targeted email attacks aimed at individual Directors or Senior Management who have authority to make payments or who are likely to make a request for payment of supplier invoices.

Human approach

Heimdal MailSentry is a security solution based around an automated tool combined with human expertise to prevent damage before it occurs in your business.

Email Spear Phishing Attacks PREVENT CEO FRAUD

Don't fall victim to **UNDERCOVER LOSS**

THE CHALLENGE

Spear Phishing Attack

CEO fraud occurs when a cyber criminal masquerades as a business owner with the intention of diverting payments into a fraudulent bank account.

THE SOLUTION

Layered Approach

A solution that sits on top of your existing SPAM filtering and Malware protection that automates the detection and reporting of CEO fraud to a team of specialists.

THE OUTCOME

Stop Spear Phishing

Additional protection that blends technology and human intelligence to detect and stop CEO fraud from compromising your business.

Part of the Heimdal Security family
